**TO SEI NOCSAE PARTICIPANTS:**

**SEI Certification Bulletin #18  
Hazardous Material Requirement**

During it's summer meeting held in Indianapolis, Indiana on June 16, 2017, the NOCSAE Standards Committee discussed the requirement outlined in NOCSAE ND001-15m17, Section 8.1, which states;

*Materials used in the headgear/equipment shall be durable and resistant to exposure to sun, rain, cold, dust, vibration, perspiration, and products likely to be applied to the skin or hair. Materials known to cause skin irritation or disease shall not be used. Lining materials, if used, may be detachable for washing. If hydrocarbons, cleaning fluids, paints or transfers/decals or other additions may affect the equipment adversely, a warning shall be provided.*

Based on that discussion, NOCSAE requested that SEI obtain an affidavit from each SEI NOCSAE participant stating that their current and future certified NOCSAE products meet the requirement as stated in ND001-15m17, Section 8.1. SEI is respectively requesting you send the affidavit statement to Tricia Hock at [thock@seinet.org](mailto:thock@seinet.org) no later than August 11, 2017.

Please feel free to call a member of the SEI staff if you have any questions regarding is bulletin.

Sincerely,

A handwritten signature in black ink that reads 'Tricia Hock'.
