

**RECALL NOTIFICATION**  
**November 1, 2019**

Dear \_\_\_\_\_,

Force3 Pro Gear has determined that a product recall is warranted for chest protector model CPN-YTH, CPN-INT, CPN-ADT designed to meet the NOCSAE commotio cordis standard. The reason for the recall is that the chest protector was pre-maturely released to you before official certification of the passing test result was confirmed and certified.

Our records show that you received a prematurely released product. To resolve this issue, Force3 Pro Gear will exchange your chest protector with the same style, model and color chest protector as soon as our certification letter has been issued to us which we expect is imminent.

If you have any questions or to arrange the return and prompt exchange of your chest protector, please call us at 315-367-2331.

Jason Klein
